

Subjective Feeling of Illness Can Be Proven Now!

On the whole disharmonies in the energetic supply field exist a long time before an organ manifestation is visible. This is the reason why patients complain about disturbances although the laboratory parameters are quite normal.

An advantage of the energetic field measurement is that energetic changes of the inner organs can be recognized long before the outbreak of the illness. Therefore this method is ideal for prevention and proactive health care.

Compatibility Tests

Reflex zone biofeedback measurement is an appropriate method of recording the individuality of the energetic system and the individual reaction patterns of the client in a very short period of time. It is a sensitive means to test the effect of remedies and nutritional products, healing stones or other therapeutical products in a fast and safe manner. It shows whether the individual's energetic pattern responds with side effects or allergic reactions.

Even to the same medicine from different manufacturers you can react differently. There are medications which act positive by one patient, and do nothing by another person with the same problems.

With the Reflexzone-Biofeedback-measuring your individual reaction to a medicament or product can be tested in detail.

Proactive Health Care

There are many people who feel unhealthy and who complain about undefined discomfort such as insomnia, excitability, indisposition, exhaustion, meteor-sensitivity, headache, dizziness, susceptibility to infections and back pain.

Only a small group of the patients receive a measurable statement and a diagnosis in the sense of traditional medicine. The reason is that they do not show any pathological blood or laboratory parameters or changes on the X-ray photography.

The Biopulsar's reflex zone biofeedback measurement as well as the aura picture show vividly the disharmonies in the energetic bodies and therefore they are easy to understand. The results correspond to the subjective feelings of the patient.

Advanced Bioenergetic Vitality Check-Up

Biopulsar-Reflexograph® Biodynamic Electro-Chiogramme

- Holistic biofeedback diagnosis
- Analysis of pain patterns and interfering fields
- Testing of allergic reactions and compatibility
- Therapy control
- Aura and chakra analysis
- Holistic life counselling
- Proactive health care

Practitioner Information

The Reflex Zone Biofeedback

The word biofeedback is an indication for biological control mechanisms. It is composed by the Greek word bio = life, life process and by the English word feedback = reaction. Reflex zones or somatotypes (derived from the Greek words soma = body and topos = place, location, area) are areas on the surface of the skin, which have connections to the internal organs and body structures.

The interpretation of the energetic situation of a reflex zone serves for diagnosis and therapy of the regulating state of the internal organs and the psyche.

The Biopulsar-Reflexograph®

Biofeedback system is a modern, multifunctional diagnostic device for the PC, based on the biofeedback of the reflex zones of the hand. Within a few minutes you receive a bioenergetic analysis of the reflex zones and the organs.

Through this reflex zone biofeedback you receive profound knowledge with respect to the client's bioenergetic field (aura), the condition of life force of the individual organ zones and the organ network, potentials, and causes of interfering fields and paraesthesia.

In the modern therapeutic practice the reflex zone biofeedback can be applied for individual remedy testings, allergy and compatibility tests, control measurements, holistic aura and life counselling, conflict and prevention consultations.

The Functionality

The Biopulsar-Reflexograph® Biofeedback system is a super-sensitive, CE-labelled bio-medical measuring device, developed in accordance with the basic safety requirements of the European Guidelines. It is based on the latest computer technology combined with the basic principles of ancient healing sciences.

The concept of the Biopulsar-Reflexograph® Biofeedback System is based on Eastern and Western holistic energy and therapy sciences.

- ▶ The presentation of the energetic system of the human body is effected through different parameters, such as the dynamical biofeedback of the organ zones in real-time, the aura colours of the organ zones, the activity of the chakras and much more.
- ▶ The Biopulsar-Reflexograph® hand sensor is a refined receiver for high-resolution biomedical signals, which are taken from the reflex zones of the palm.
- ▶ Every 500 milliseconds (real-time) biodata is taken from at least 43 organ zones and transferred to the PC. There the data is processed and presented with the help of the software in various graphical displays.
- ▶ There is no exposure of the body to harmful or disturbing impulses during measurement. In comparison to many other diagnosis systems, that often expose the body to harmful radiation, only low frequency and absolutely harmless impulses are used for measuring the skin resistance. Thus, the system can also be applied with electro-sensitive people, people with pacemakers or during pregnancy.
- ▶ In general, a complex bioenergetic measurement of the whole body takes only a few minutes. Therefore, the client even does not have to disrobe. You receive the energetic syndromes of 43 organ reflex zones in a short period of time and in a clearly arranged form.
- ▶ From the reflex zone biofeedback and the dynamic aura of the whole body the therapist can read information regarding the vitality and the physical as well as the psychological state of the client.
- ▶ In most cases, the results of the biofeedback measurement correspond with the subjective feelings of the client.

The Aura and Chakra Diagnosis

Often organ reactions are very sensitive to conscious or unconscious thoughts, feelings and emotional information. The interaction between body and psyche is emanated through the aura and the chakras in dynamic painted colour frequencies. This aura can be perceived by clairvoyant people. Through a Biopulsar® aura picture and the organ aura table the therapist can recognize very quickly the physical and psychological constitution, subtle energy relations, pain syndromes, tension, blockages and potentials. The patient sees himself perceived by the therapist in a holistic manner, physically as well as intellectually and spiritually.

The aura diagnosis is an important basis for a holistic life counselling.

The Chromalive® Colour Light Therapy

For thousands of years healing colours have been applied in order to lead body, mind and soul back in a harmonious original state. With this special penlight you can tonate disharmonious organ zones with healing colours. The individual healing colour can be determined through the Biopulsar's reflex zone colour biofeedback. Through the specific colour light treatment of certain reflex zones you can achieve a regulating and harmonizing interaction with the inner organs and the psyche. This method is also used for pain treatment and rejuvenation therapies.
